

Consultants with a difference for the CSIR-800 Program of Science for Society

WANTED

Two bright young energetic consultants, graduates/post-graduates in Agriculture, natural, applied, social sciences or any stream of engineering, eager to have a career path different from the usual. And make a difference to our country.

THE MISSION

You will spend half your time living and working in 30 village clusters in the backward districts of India helping the CSIR-800 Program make a difference to village life through technologies.

Technologies that augment incomes and the quality of life of communities spread across the face of India.

You will be the interface between CSIR labs that create the technologies and villages/NGOs/state officialdom that implement these technologies.

The other half of your time will be at the CSIR-800 Coordination Centre at Bangalore where you will help the team coordinate technology implementation across India.

ACTION

If interested, mail vbian1020@gmail.com for program details.

Then apply through a tight, simple-English 3 pages précis on your education, work, and experience in the context of the CSIR-800 program.

Last date of application: 08 November 2013
