Read the given passage and solve questions 85-89 based on it.

The forces that generate conditions conducive to crime and riots are stronger in urban communities than in rural areas. Urban living is more anonymous living. It often releases the individual from community restraints more common in tradition-oriented societies. But more freedom from constraints and controls also provides greater freedom to deviate. And living in the more impersonalised, formally controlled urban society means that regulatory orders of conduct are often directed by distant bureaucrats. The police are strangers executing these prescriptions on an anonymous set of subjects. Minor offences in small towns or villages are often handled without resort to official police action. As disputable as such action may seem to be, it results in fewer recorded violations of the law compared to the big cities. Although perhaps causing some decision difficulties for the police in small towns, formal and objective law enforcement is not always acceptable to villagers. Urban areas with **mass population, greater wealth, more commercial establishments and more products of our technology** also provide more frequent opportunities for theft. Victims are **impersonalised, property is insured, consumer goods in more abundance are vividly displayed and more portable**. The crime rate increases despite formal moral education given in schools.

85.	The passage suggests that the anonymity of urban living primarily contributes to crime by a. Reducing the role of moral education b. Weakening community-based restraints on individuals c. Encouraging disputes to be handled privately d. Increasing the authority of distant bureaucrats
86.	Which of the following is a characteristic of an urban setting? a. Unreported minor crimes b. Deviation from freedom c. Less forceful social control d. Minimal opportunities of crime due to better law enforcement
87.	The author's view of 'Traditional Societies' is best expressed by which of the following? a. They provide less freedom for the individual in many circumstances b. They have lower crime rates because of the moral teachings in schools c. They provide inadequate freedom for personal movements and travel d. They do no have adequate modern technology
88.	People live under more social control in a. Formally controlled urban societies b. The presence of the police authorities c. An anonymous form of living d. None of the above

89.	It can be inferred from the passage that urban crime can be controlled by
	    a. Greater emphasis on moral education
	    b. Enforcement of law by distant bureaucrats
	    c. Vivid display of expensive consumer goods
	    d. None of the above

Read the given passage and based on it, answer questions 90-94.

I consider myself something of an authority on apologies, because a quick temper has provided me with plenty of opportunities to make them. In one of my earliest memories, my mother is telling me to not look at the ground when I say 'I'm sorry', and instead hold my head up and look the person in the eye so he'll know I mean it.

My mother, thus, conveyed the first principle of successful apology: it must be direct. You must never pretend to be doing something else. You do not leaf through a sheaf of correspondence while apologising to a subordinate after blaming her for a mistake that turned out to be your fault.

You do not apologise to a hostess whose guest of honour you insulted by sending flowers the next day without mentioning your bad behaviour.

90.	According to the author's mother, the best way to apologise is
	
	    a. To say 'sorry' while looking at the ground
	    b. To look the person in the eye, even if you don't say sorry
	    c. While saying 'I'm sorry,' look the person in the eye
	    d. To hold your head up and avoid looking at the person
